ASPAN®

Astana, 2026

About us / Aspan Drone

- The largest drone racing community in Kazakhstan, bringing together pilots, coaches, organizers, and drone enthusiasts.
- Official partners of MultiGP, the world's largest drone racing league.
- The only team from Kazakhstan competing in the Drone Champions League (DCL) and the Games of the Future — both recognized as prestigious international competitions.

About comunity Aspandrone:

- Organizes national and international drone competitions;
- Develops rules and regulations for drone racing;
- Trains pilots for world championships, including training camps and qualification stages;
- Promotes drone technology and racing among youth;
- Collaborates with educational institutions and clubs to develop drone sports in Kazakhstan;
- Partner of international programs and competitions such as MultiGP (over 40,000 pilots), FAI (190 countries), and Drone in Schools (STEM).

Drones

GLOBAL INDUSTRY DRONES

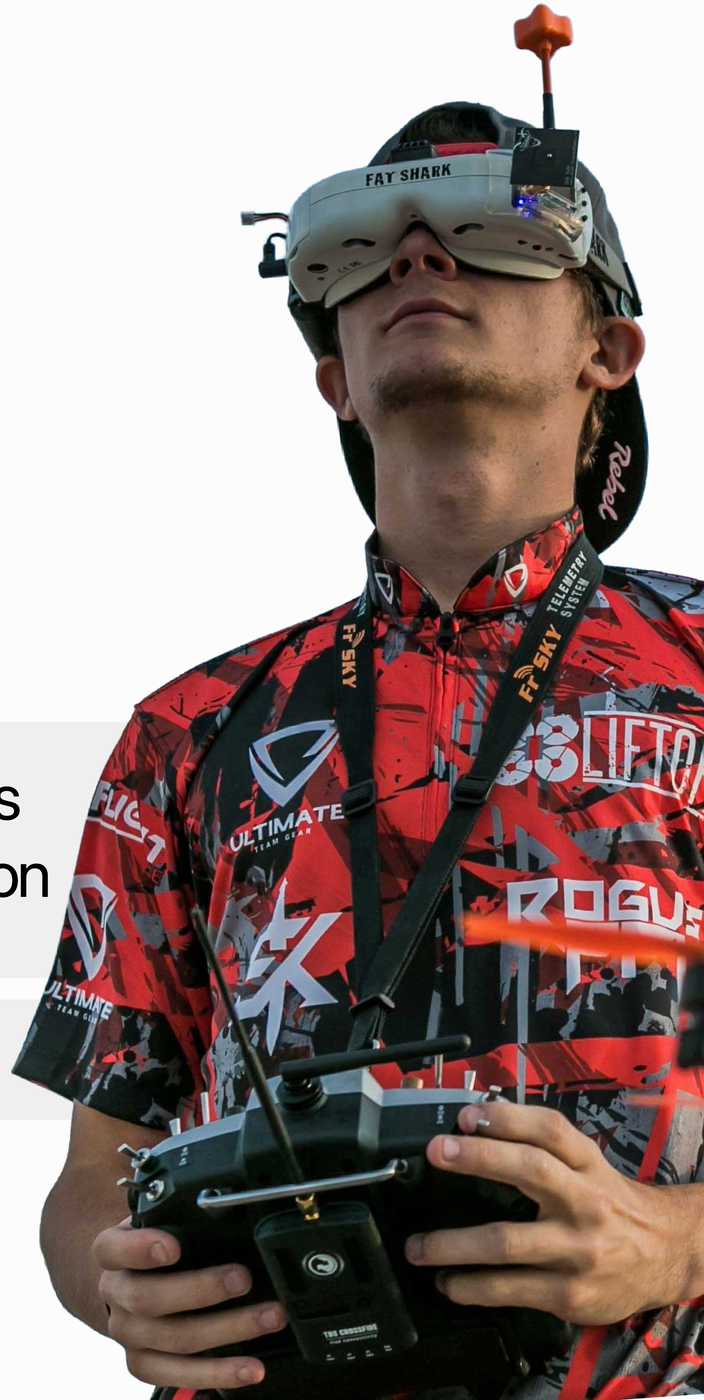

Drones are used in various industries: film industry, entertainment, sports, logistics, agriculture, and AI

CAGR 15.5%, with the total market volume projected to reach $90 billion by 2030

By 2030, the AI drone market is projected to grow to $2.75 billion

Shortage of drone operators

Speed up to 690 km/h

About sport

Drone Industry in Kazakhstan

A developing industry with the involvement of 4% of the population

Forecast by 2030: every 25th Kazakhstani will be using a drone

1,000 enthusiasts (FPV drone pilots)

Aspandrone — the first community in Kazakhstan, uniting the drone industry across in the region!

Team Experience

Kazakhstan Drone Championship & Cup reel

100 participants from more than 11 regions of Kazakhstan.

CENTRAL ASIAN ALMATY TECH CUP reel shorts

Over 400 participants and 5,000 visitors.

ASPAN MULTIGP GLOBAL QUALIFIERS EVENTS shorts

200 participants and 1,000 visitors.

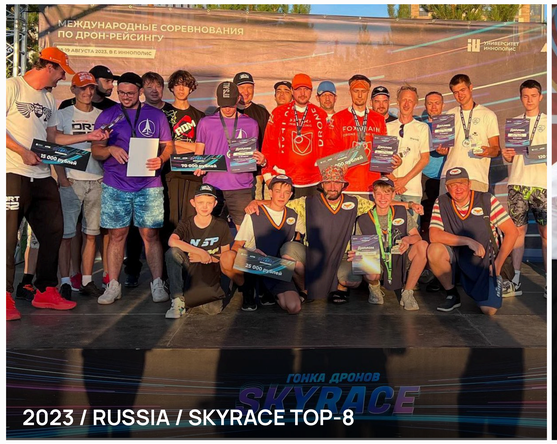

ASPAN FEST 2023, 2024, 2025

100 participants from 10 countries.

OUR ACHIEVEMENTS

OUR STUDENTS RANK AMONG THE TOP 8 TEAMS IN THE WORLD.
PARTICIPATED IN THE PROFESSIONAL CHAMPIONSHIP “GAMES OF THE FUTURE.”
COMPETING IN THE PRESTIGIOUS DCL (DRONE CHAMPIONS LEAGUE).

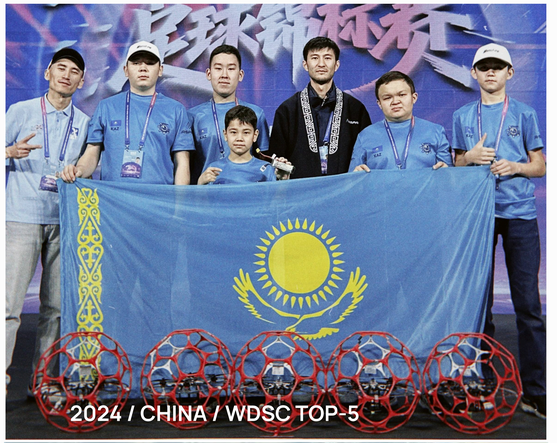

2023 / RUSSIA / SKYRACE TOP-8

2023 / RUSSIA / ROSTEC TOP-4

2024 / TATARSTAN / GAME OF FUTURE TOP-6

2024 / CHINA / WDSC TOP-5

2025 / SAUDIA / TOP -16

2024 / TURKEY / TOP - 10

2025 / USA / 2 PLACE

2025 / SERBIA / WORLD CUP FAI TOP-10

Competitions

Drone soccer

reel

Playing soccer with drones

Drone soccer is a team sport where two teams compete to score the most goals using drones. This aerial sport combines remote-controlled drone flight with football, creating an exciting experience for both players and spectators—taking traditional football to a whole new level, literally.

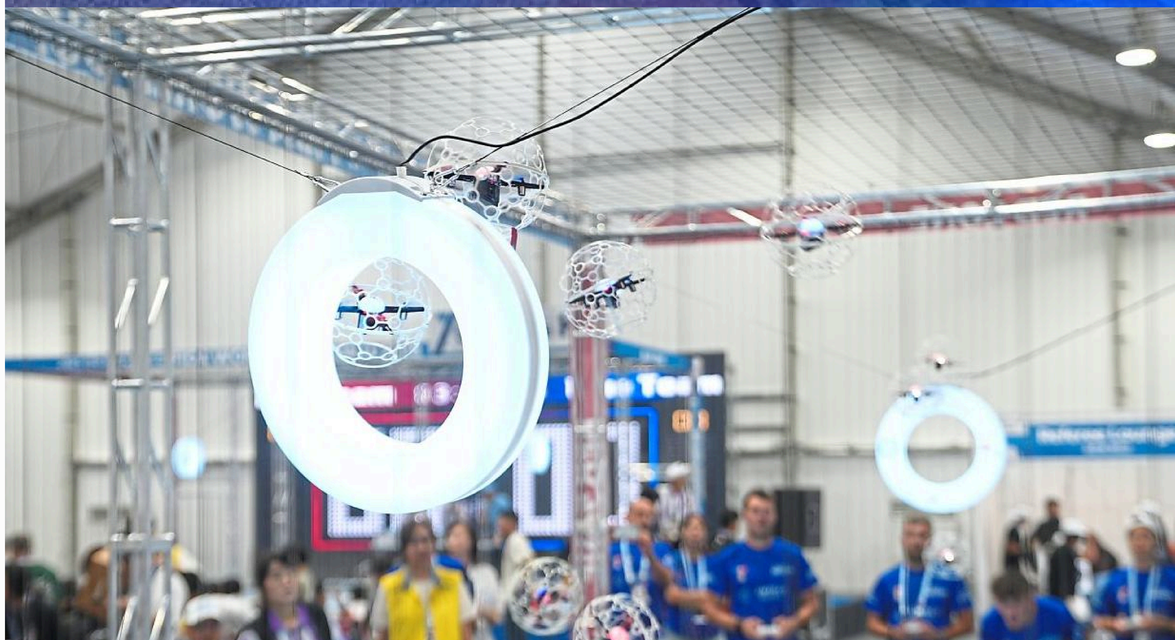

01 Accessible for all ages.

02 Easy to learn, with interactive on-site experience.

03 Strategies, tricks, just like in football.

04 Up to 128 participants per hour.

Competitions

Micro drone race

reel

Indoor drone racing.

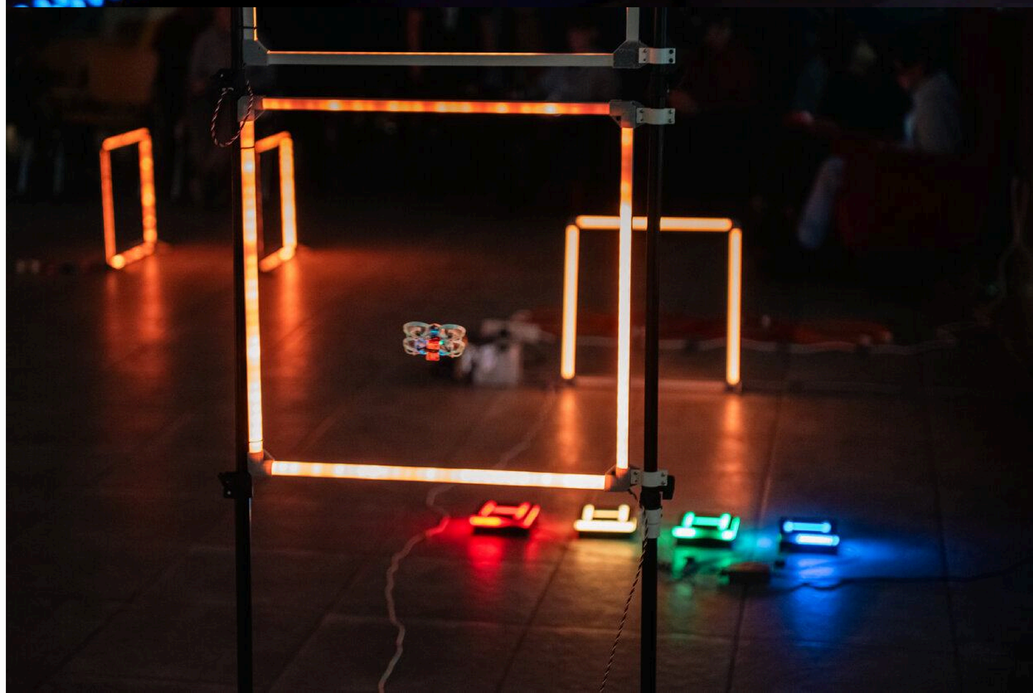

Micro drone racing is a competition using small FPV drones on tracks with obstacles, gates, and tunnels. It requires high precision and quick reflexes, usually takes place indoors, and creates an exciting, dynamic atmosphere.

01 Safe and exciting racing for children and adults.

02 Time-based format — the fastest wins.

03 Top pilots will receive prizes.

Competitions

Cyber sport simulator

cyber simulation **youtube**

A cyber tournament in a drone simulator is a competition where pilots control drones in a virtual environment, competing in track completion speed, control accuracy, and flight tactics.

01 Online participants can attend

02 Offline final top pilots gather for a tournament in a cyber esports-style format.

03 The best are selected for prestigious leagues.

Competitions

High speed drone racing

reel

A professional sport that captures everyone’s attention.

Drone racing is high-speed flying through obstacle-filled tracks in both individual and team formats. Drones can exceed speeds of 200 km/h, making precision, reaction time, and stability critical. The FPV system allows pilots to see from a first-person view, fully immersing them in the race.

01 Individual time trial — pilots compete against the clock for the fastest lap.

02 Head-to-head race — multiple drones fly on the track simultaneously, battling for position and victory.

03 Grand Final — the best pilots battle for the title at extreme speeds.

04 Team race — coordinated flights where teams combine strategy and speed to outperform their rivals.

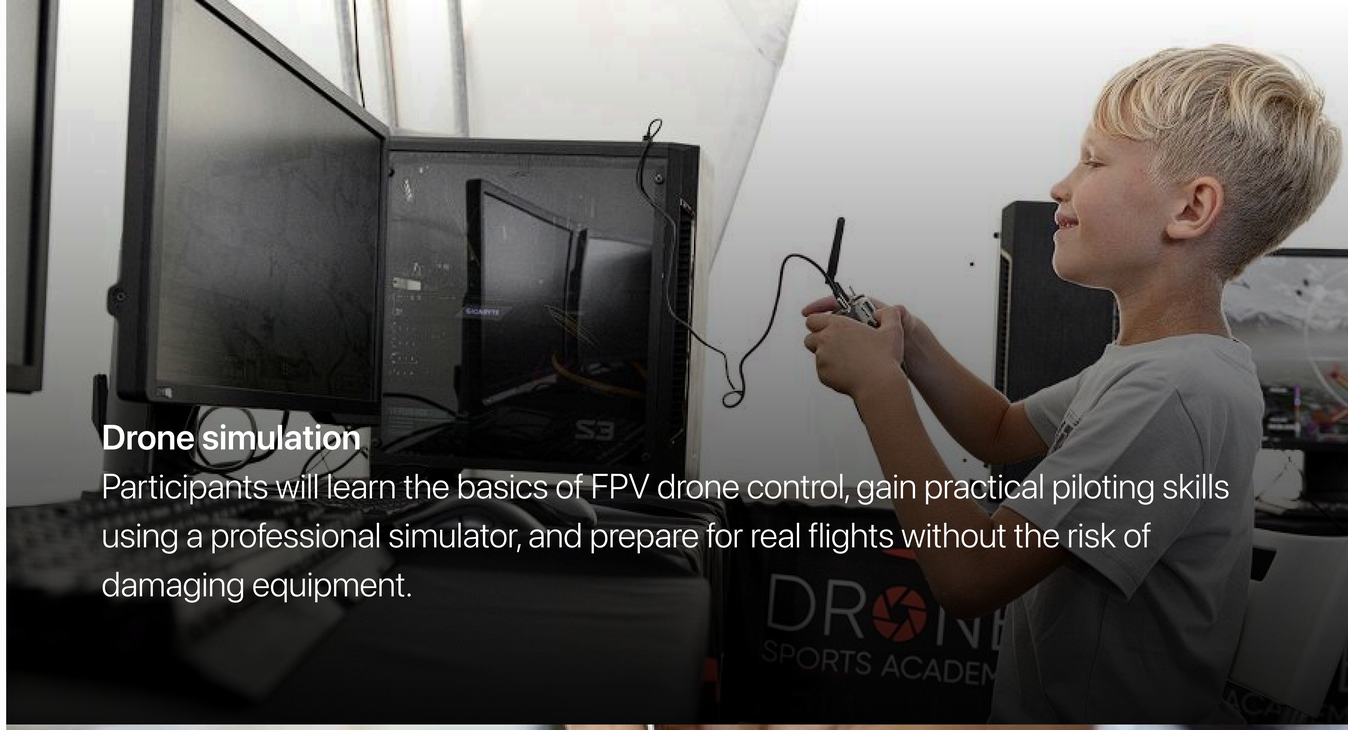

Education programs

Drone development & coding

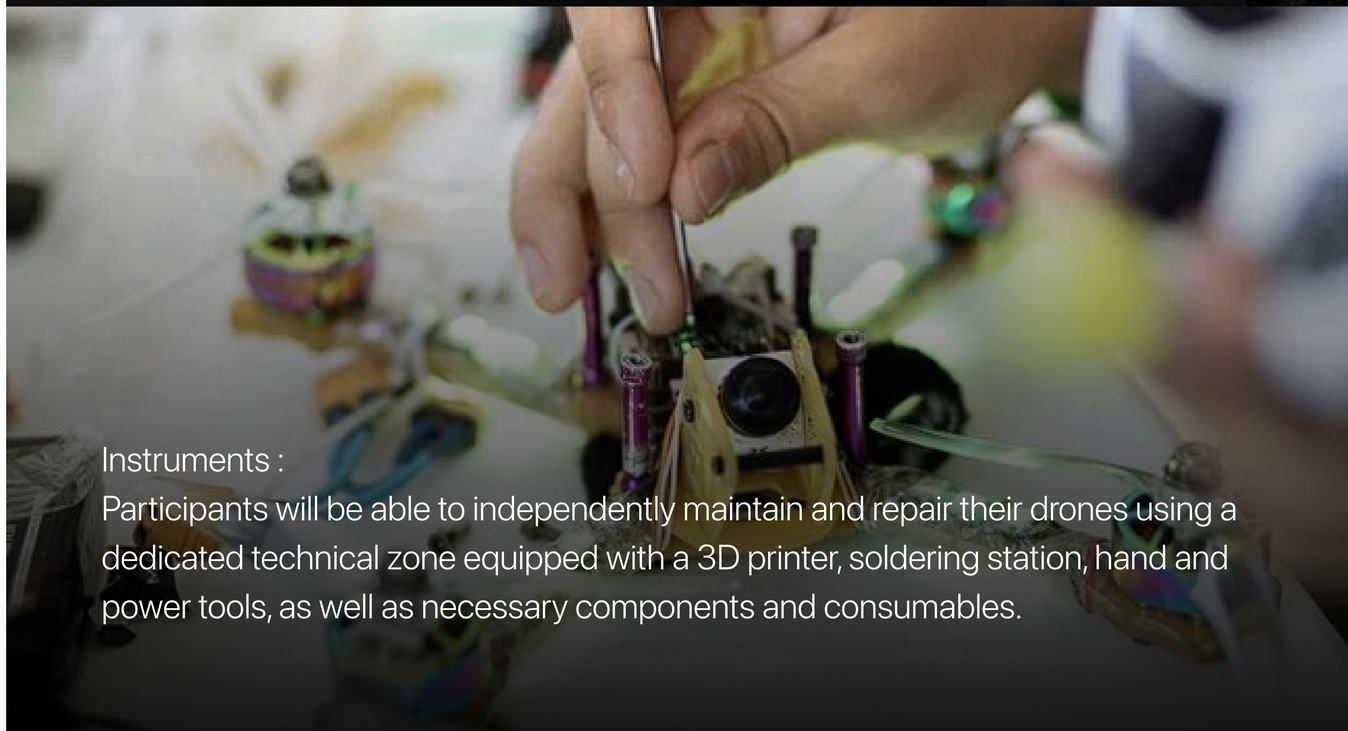

From zero to developing

Participants will be able to:

- Develop their first prototype
- Test drones
- Repair and maintain equipment
- Programm a drone
- Learn to fly using drone simulators
- Become a drone developer

Drone simulation
Participants will learn the basics of FPV drone control, gain practical piloting skills using a professional simulator, and prepare for real flights without the risk of damaging equipment.

Instruments :
Participants will be able to independently maintain and repair their drones using a dedicated technical zone equipped with a 3D printer, soldering station, hand and power tools, as well as necessary components and consumables.
